

**Penterra™** is an effective soil penetrant and soil surfactant to keep soils from locking up. **Penterra** loosens soils including clay, improves soil structure and allows water and oxygen to better reach plant roots by reducing the surface tension between the water and the soil. **Penterra** assists fertilizers and plants by increasing plant nutrient uptake and keeping the soil aerobic thus increasing the amount of oxygen exchanged within the soil profile.

**Penterra** is designed to decrease the surface tension between water, soil and plants while improving the growth and activity of aerobic micro-organisms necessary for a healthy soil profile environment. **Penterra** is easy to mix and use. Its beneficial secondary effect of reducing LDS (Localized Dry Spot) are noticed quickly. By using **Penterra**, not only are you improving the soil, but you are also adding a long term soil management component to make turf and plants healthier, increase disease resistance and insect tolerance. **Penterra** is an important tool for every gardener and landscaper.

SOILSURFACTANT.COM

## Earth-Friendly & Effective For all types of turf, all types of soil

- Decreases surface tension
- Helps to loosen hard soils, even clay
- Activates soil organisms
- Extremely fast-acting
- Helps dry out wet areas
- Improves root growth by loosening soil
- Improves air and water penetration
- Helps save water & reduce plant stress
- Improves drainage & prevents erosion
- Improves soil porosity
- Economical to use
- Environmentally friendly

### APPLICATION RATES

Mix one teaspoon of Penterra per gallon of water. Apply solution liberally to areas to be treated. Follow application with hand watering or irrigation.

### Non Plant Food
